Glocester City, NJ 08030

Dear Mr. Burrows:

We are pleased to confirm your reception of the WYNS program signal on 2/26/87. I have enclosed a copy of our contour map for your reference. I believe it should answer most of your questions on technical parameters.

Additionally, to answer some other questions posed in your letter--we broadcast 24 hours a day in AM stereo, with the exception of Sunday night/Monday morning, when the station leaves the air between the hours of 12 midnight and 5:30 a.m., for maintenance purposes. Our network is the ABC Entertainment Radio Network. The studio and transmitter are located at R.D. #4, Nis Hollow Road, Lehighton, PA, and we employ a 3-tower directional array. Our music format is Oldies hits of the 50's, 60's and 70's, one of the many variations of the so-called Nostalgia Format. To date, the furthest signal report we have received originated from Oshawa, Ontario, Canada. We do receive quite a few DX letters and appreciate getting responses and feedback from our DX listeners, some of whom have made very favorable comments on what they've heard, which we take as a great compliment.

Thank you very much for your interest in WYNS Radio.

Sincerely,

Jill Adams
